-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: wherein the inflated state is greater than a range of an intended expanded configuration and wherein the inflated state is less than a range of an intended expanded configuration. The species are independent or distinct because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 5 – 20 are generic.

2. This application contains claims directed to the following patentably distinct species: wherein the inflated state is maintained at the same or generally same level during the application of the substance, wherein the inflated state is monotonically increased during the application of the substance, wherein the inflated state is monotonically decreased during the application of the substance, and wherein pulsating the balloon to a greater and/or smaller size during the application of the substance. The species are independent or distinct because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 4 and 8 – 20 are generic.

Art Unit: 1762

3. This application contains claims directed to the following patentably distinct species: wherein the balloon is reduced to a deflated state or to the collapsed configuration prior to or during the process of removal of the fluid carrier, wherein the balloon is inflated to a greater extent prior to or during the process of removal of the fluid carrier, and wherein the balloon is partially deflated prior to or during the process of removal of the fluid carrier. The species are independent or distinct because they are mutually exclusive

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 9 and 13 – 20 are generic.

4. This application contains claims directed to the following patentably distinct species: wherein the inflated state is maintained at the same or a generally same level during the removal of the fluid and wherein the balloon is pulsed to a greater and/or smaller size during the removal of the fluid carrier. The species are independent or distinct because they are mutually exclusive

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 12 and 15 – 20 are generic.

5. This application contains claims directed to the following patentably distinct species: wherein gas is blown contemporaneously with the application of a substance and wherein gas is blown subsequent to the application of the substance. The species are independent or distinct because they are mutually exclusive

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 16, 19, and 20 are generic.

6. This application contains claims directed to the following patentably distinct species: wherein the balloon is inflated prior to application of the substance and wherein the balloon is inflated subsequent to the application of the substance. The species are independent or distinct because they are mutually exclusive

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 18 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

7. The election of species must be consistent (i.e. capable of use together in the same embodiment).

8. Due to Applicant's preference for written restrictions, a telephone call was not made.
